

EcoCosy® Wood-based Cellulosic Fibre · Nonwoven

Natural and friendly to skin

Pure

- Natural, outstanding moisture absorption, 100% sourced from well managed certified wood plantation
- Gentle and skin-friendly, 100% bio-based certified
- Fully biodegradable and free from harmful substance

Caring

- Ultra soft and close to skin, smooth and breathable
- Care from planting to environmental protection, we ensure responsible stewardship

Safe

- Transparent and Traceable
- Authoritative international certifications

EcoCosy® A touch of Nature

Whole-process sustainable management

Sustainable management plantations

Dissolved pulp from 100% international certified woods.

Bio-based products

100% bio-based products certified by USDA (United States Department of Agriculture), free of petroleum derivatives.

World-leading fibre production management and control

The best practical model of sustainable production with level-3 (top-level) Swiss STEP by OEKO-TEX® certification.

Strictly complying with ZDHC Wastewater Guidelines to minimize the impact on environment. Higg Index FEM 3.0 scored 90% in average which leads the sustainable environmental management in fibre manufacturing.

Swiss STANDARD 100 by OEKO-TEX® certified, eco-environmental protection, free from harmful substances, reaching the safety level of infants.

With the product raw material secured by OEKO-TEX® MADE IN GREEN, manufacturing high-standard products satisfying the environmental protection and security requirements, and undertaking social responsibilities.

Fully biodegradable

With reliable compostable degrading "Seedling" certificate, the products can be bio-degraded fast in 90 days without harmful substance.

Having obtained American BPI (Biodegradable Products Institute) industrial compostable label certificate.

* Tested with 100% EcoCosy fibre wipes.

Safe and reliable products

Having passed the American FDA (Food and Drug Administration) certification, the REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) test, and the Enstain biological safety certification, the products are safe, reliable and free of cytotoxicity and sensitization.

* Tested with 100% EcoCosy fibre wipes.

EcoCosy®
优可丝® Thin·Soft

— MORE THIN AND SOFT , MORE COMFORTABLE —

— MORE THIN AND SOFT , MORE COMFORTABLE —

EcoCosy® 优可丝® Thin·Soft

EcoCosy Thin-soft™ fibre, derived from internationally certified plantations, has smaller fineness than that of conventional fibres but high strength. As the non-woven fabrics manufactured with EcoCosy Thin-soft™ fibre is uniquely thin and soft, flat and smooth, strong and durable, skin-friendly and transparent, breathable, free of additives, and non-allergic, the baby and food grade safety , and they are widely applied in products that people use on their skin (dry wipes, facial masks, personal care products, and masks, etc.)

Thin and Soft

With thinner fibre and smaller rigidity, EcoCosy Thin-soft™ fibre is a preferred material of spunlace non-woven fabrics of light weight. The EcoCosy Thin-soft™ non-woven fabric is soft to the touch, skin-friendly, and fits to skin . It has obvious advantages over pure cotton and polyester in terms of softness.

The result of the test carried out by third party is as shown in the diagram. The softness of EcoCosy Thin-soft™ non-woven is 2.2 times and 5 times of that of cotton non-woven fabric and polyester non-woven fabric separately.

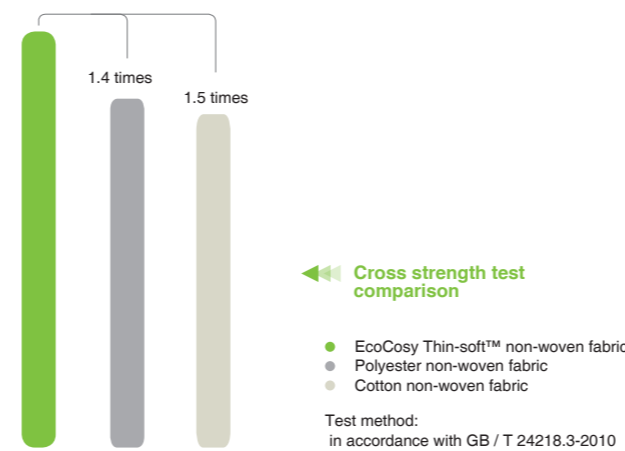

Flat, Smooth and Fine without Hurting Skin

With the unique material formula of EcoCosy Thin-soft™ fibre, EcoCosy® fibre's groove structure, the fine fibre is knitted more compact with fine pore space, and the non-woven fabrics made from those fibres are flat and smooth without hurting skin as well as being easy to clean.

Weightless, Soft, strong and Durable

As for EcoCosy Thin-soft™ fibre, the strength of a single fibre is great, and the fine fibre property is good for knitting, forming fine pores, and is helpful in efficiently increasing the fibre's cross strength as well as reducing the cross strength. When using EcoCosy Thin-soft™ non-woven products, the consumers will truly feel its weightlessness and softness, and no matter it is pulled transversely or longitudinally, its resistance to pulling is good, and it can be for repeated use.

The result of the test carried out by third party is as shown in the diagram. The cross strength of EcoCosy Thin-soft™ non-woven is 1.5 times and 1.4 times of that of cotton non-woven fabric and polyester non-woven fabric separately.

EcoCosy Thin-soft™ non-woven Cotton non-woven

Water vapor molecules penetrate the nonwoven fabric, the greater the mist, the better the breathability

Infant and Children grade safety + Food grade safety

EcoCosy Thin-soft™ fibre has passed the Standard 100 by OEKO-TEX® test for category I products, which shows that EcoCosy Thin-soft™ fibre conforms to the latest provisions on textile ecology set in the Standard for baby products and the REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) requirements. Otherwise, as EcoCosy Thin-soft™ fibre has passed the America FDA test, it's assured that it has food grade quality assurance.

No Additives and Non-allergized

During the production process of EcoCosy Thin-soft™ fibre, no any flourescent whitening agent is added, and as tested, the fabrics made by EcoCosy Fresh™ fibres have no residual flourescent whitening agent.

As EcoCosy Thin-soft™ fibre, originated from 100% certified woods, have passed the bio-based product certification by USDA (United States Department of Agriculture) , has not added any petroleum derivatives, and has passed Enstain biological safety certification, it's assured that the EcoCosy Fresh™ fibres are safe, reliable, and non-allergic.

Skin-friendly

The non-woven fabrics manufactured by EcoCosy Thin-soft™ fibre are thinner and uniform, and when it is wet, it is invisible and can fit skin perfectly, moreover, you may feel comfortable and the moisture can be direct to the skin deep. The mask is made of such non-woven fabrics is ultra smooth and gentle on face.

Breathable and Caring

As for EcoCosy Thin-soft™ fibres, the knitting texture will form fine pores. The unique groove structure makes the non-woven fabrics made by EcoCosy Thin-soft™ fibres more fluffy. EcoCosy Thin-soft™ fibre is breathable, which is better than that of cotton products, fast heat dissipation offers better caring for the sensitive delicate skin.

Non-irritating and non-allergic
Natural bacteriostasis
