EcoCosy® 优可丝® Ultra Care

As consumers pay more attention to safety, there are more requirements of higher safety level on the raw materials of the product that may directly contact skin. As more and more attentions are paid to the potential impact of using and adding chemicals during the production process, especially organic chlorides (AOX and EOX) generated in the production and bleaching steps, on consumers' health, EcoCosy Ultra-Care™ fibre emerge.

As for EcoCosy Ultra-Care™ fibre, originated from the internationally certified plantations, chlorine-free bleaching close-loop production technology is applied from the raw material to the production process, and the non-woven fabrics manufactured with those fibre is healthy, safe, pure, free of additives, non-allergic, and featured with less odor factors and breathable, therefore, with EcoCosy Ultra-Care™ fibre, we can manufacture medical grade non-woven products with child and food grade safety

No residual chloride, Safety and Protection

As for EcoCosy Ultra-Care™ fibre, besides the excellent properties of EcoCosy products, strict management and control are executed from the beginning, and during the pulp and fibre production processes, chloride-free bleaching technology as well as the world-leading technologies and close-loop manufacturing technology from Finland are employed, and the environmental index is superior to the EU's optimal practicable technical standards.

- According to the test carried out by the third party authority, neither absorbable organic halogen (AOX) nor extractable organic halogen (EOX) has been detected in EcoCosy Ultra-Care™ fibre and the pulp of the raw materials.

Child grade safety + Food grade safety

EcoCosy Fresh™ fibre has passed the Standard 100 by OEKO-TEX® test for category 1 products, and this shows that EcoCosy Fresh™ fibre conforms to the latest provisions on textile ecology set in the Standard for baby products and the REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) requirements. Otherwise, as EcoCosy Fresh™ fibre has passed the America FDA test, it's assured that it has food grade safety

No Additives and Non-allergized

During the production process of EcoCosy Fresh™ fibre, no any fluorescent whitening agent is added, and as tested, the fabrics made by EcoCosy Fresh™ fibre has no residual fluorescent whitening agent.

The Enstain biological safety certification, the products are safe, reliable and free of cytotoxicity and sensitization.

Fewer Factors and much Healthier

Odor factor test

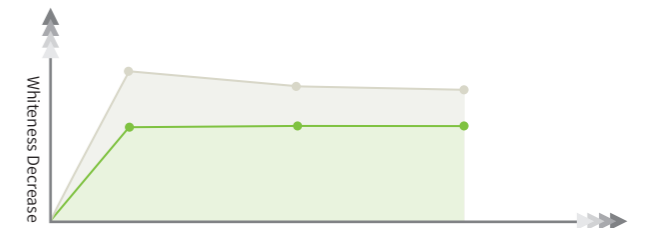

* The results of odor factor test carried out by third party on EcoCosy Fresh™ fibre and similar products 1 and 2 are as below.

As tested, EcoCosy Ultra-Care™ fibre has few odor factors residual.

More Stable Whiteness

Compared with common cellulosic fibre, after being treated in high-temperature and high-pressure, the whiteness is more stable, therefore, EcoCosy Ultra-Care™ fibre is very suitable for the application of the disposable medical and home and personal care products that shall be high-temperature and high-pressure treated before using.

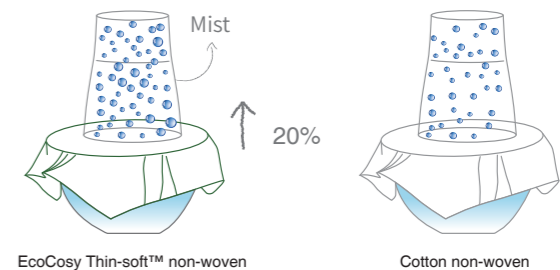

* Whiteness Changes of the Fibre Sample Tested 0.5 hour after 120°C High-Temperature and High-Pressure Treatment

● EcoCosy Ultra-Care™ Fibre Sample ● Common Non-woven Fibre Sample

Breathable and Caring

EcoCosy Ultra-Care™ With knitting texture the groove structure makes the non-woven fabrics more fluffy and the breathability of fabric is better than that of cotton products. EcoCosy Ultra-Care™ can care the sensitive delicate skins better.

Water vapor molecules penetrate the nonwoven fabric, the greater the mist, the better the breathability

EcoCosy® Wood-based Cellulosic Fibre · Nonwoven

Natural and friendly to skin

Pure

- Natural, outstanding moisture absorption, 100% sourced from well managed certified wood plantation
- Gentle and skin-friendly, 100% bio-based certified
- Fully biodegradable and free from harmful substance

Caring

- Ultra soft and close to skin, smooth and breathable
- Care from planting to environmental protection, we ensure responsible stewardship

Safe

- Transparent and Traceable
- Authoritative international certifications
